CHOICE VEGETABLE AND FLOWER SEEDS

How to Order by Mail

NAME AND ADDRESS SHOULD ALWAYS BE GIVEN. Frequently, orders are received when the sender has failed to give his name, or the Post-Office address has been omitted; hence, for this reason, the order cannot be filled. Please use the order sheet enclosed with this list, giving your name, full Post-Office address, and how you wish the order sent: by Parcel Post, Express, or Freight. Be sure to give your nearest Express Office or Railroad Station, where it is different from your Post-Office address. Duplicate order sheets will be sent on request.

HOW TO SEND MONEY. Remittances may be made by **Money Order, Draft, or Check.** If cash or **stamps** are sent, be sure to register the letter.

ALL GOODS IN THIS LIST are offered subject to being unsold on receipt of order, and the prices quoted are subject to change without notice.

ALL ADVANCE ORDERS for growing crops are booked by us subject to crops permitting. In the event of unforeseen disasters to our growing crops or warehouses, should shortage necessitate it, we reserve the right to fill such orders **pro rata.**

TERMS. All goods sold to regular customers or parties of approved credit are due and payable June 1, 1956, without regard to date of purchase. All goods purchased after June 1 will be due and payable 30 days from date of invoice. F. O. B. Albany. No charge for bags.

NON-WARRANTY. Complaints made that seeds are not good should quite as often be attributed to causes other than to the quality of the seeds. There are hundreds of contingencies continually arising to prevent the best seeds always giving satisfaction, such as sowing too deep, too shallow, in too wet or too dry soil; insects of all descriptions destroying the plants as soon as, or before, they appear; wet weather, cold weather, frosts, chemical changes in the seeds induced by temperature, etc. For the above reasons it is impracticable to guarantee seeds under all circumstances, therefore FREDERICK W. EBERLE gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants he sells, and he will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned. When mentioned, purity and germination tests are for information only and without guarantee.

Eberle's Vegetable Seeds

ARTICHOKE

LARGE GREEN GLOBE. The flower-heads or buds are thick and fleshy, very tender and delicious . . . \$0 55 Oz. ¼lb. 1 lb.

CABBAGE, continued

	Oz.	$\frac{1}{4}$ lb.	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.
COPENHAGEN MARKET. A desirable early, round-headed variety. Compact, short-stemmed plants maturing in about 70 days.	\$0 65	\$2 00	\$6 00	\$5 50	\$5 00
DANISH BALLHEAD. Short-stemmed strain. Deep, round solid heads. Most popular for storage purposes. 110 days.	65	2 00	6 00	5 50	
HOLLANDER RED RESISTANT. A main-crop variety. Heads medium-size and very uniform.	90	2 70	8 00	7 50	7 00
GLOBE YELLOWS-RESISTANT. A strain similar in type to Glory of Enkhuizen Cabbage, but resistant to yellows disease. 78 days.	75	2 30	7 00	6 50	6 00
GOLDEN ACRE No. 1. Our leading extra-early Cabbage. This improved strain is the earliest of round-headed varieties. The heads are very solid and uniform in size, averaging 6 to 8 pounds in weight, and of remarkably fine quality. The compact, short-stemmed plants permit close planting. 60 days.	75	2 30	7 00	6 50	6 00
GOLDEN ACRE No. 2. Especially valuable for early planting. Round heads uniform in shape and size. 63 days.	75	2 30	7 00	6 50	6 00
GOLDEN ACRE YELLOWS-RESISTANT. 62 days.	75	2 30	7 00	6 50	6 00
EARLY RED. Superior, early, short-stemmed, deep red, solid heads. Weigh 3 to 4 pounds.	90	2 70	8 00	7 50	7 00
MAMMOTH ROCK RED. Large, deep, solid, flat heads. The best of the large-type red Cabbages. 100 days.	65	2 00	6 00	5 50	5 00
MARION MARKET. A yellows-resistant strain developed from Copenhagen Market. 75 days.	65	2 00	6 00	5 50	5 00
PENN STATE BALLHEAD. One of the heaviest of the Danish Ballhead type. Retains color longer than most late sorts. 100 days.	75	2 30	7 00	6 50	6 00
WISCONSIN NO. 8. (Yellows-resistant.) For late crop. Good keeper. Large, firm, globular heads. Average weight 7 to 9 pounds. 110 days.	75	2 30	7 00	6 50	6 00

CHINESE CABBAGE *2 to 3 pounds per acre*

	Oz.	$\frac{1}{4}$ lb.	1 lb.
CHIHILI. Long, cylindrical, compact heads, very solid and excellent quality. Most popular market sort. .	\$0 30	\$0 85	\$2 50
MICHIHLI. Similar to Chihli but more uniform.	65	2 00	6 00

CARROT *3 to 4 pounds per acre*

	$\frac{1}{4}$ lb.	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.	50 lbs. or more per lb.	100 lbs. or more per lb.
CHANTENAY, LONG TYPE. Has taken first place among early bunching Carrots. Slimmer at shoulder than regular Chantenay; almost coreless; $6\frac{1}{2}$ inches long. Good deep-colored skin and fine-grained tender flesh, with delicate flavor. Does well on either muck or upland soils.	\$1 00	\$3 00	\$2 90	\$2 80	\$2 70	\$2 60
CHANTENAY, RED-CORED. Shape and length are similar to Chantenay; the small core is deeper colored. Roots are smooth and stump-rooted.	1 00	3 00	2 90	2 80	2 70	2 60
DANVERS HALF-LONG. This might be called a standard variety. Popular with market gardeners in many states. Has good bunching top. Roots grow about 7 inches long, tapering uniformly to the blunt end.	1 00	3 00	2 90	2 80	2 70	2 60
GOLD SPIKE. A long, slender, very attractive Carrot of excellent color. An ideal bunching Carrot.	2 00	6 00	5 80	5 60	5 40	5 20
HUTCHINSON. A long deep orange-colored variety with strong top. Excellent for bunching.	1 00	3 00	2 90	2 80	2 70	2 60
IMPERATOR. Extensively grown in California. A long slender Carrot for bunching. Roots $8\frac{1}{2}$ inches long, with semi-blunt end. Deep orange.	1 00	3 00	2 90	2 80	2 70	2 60

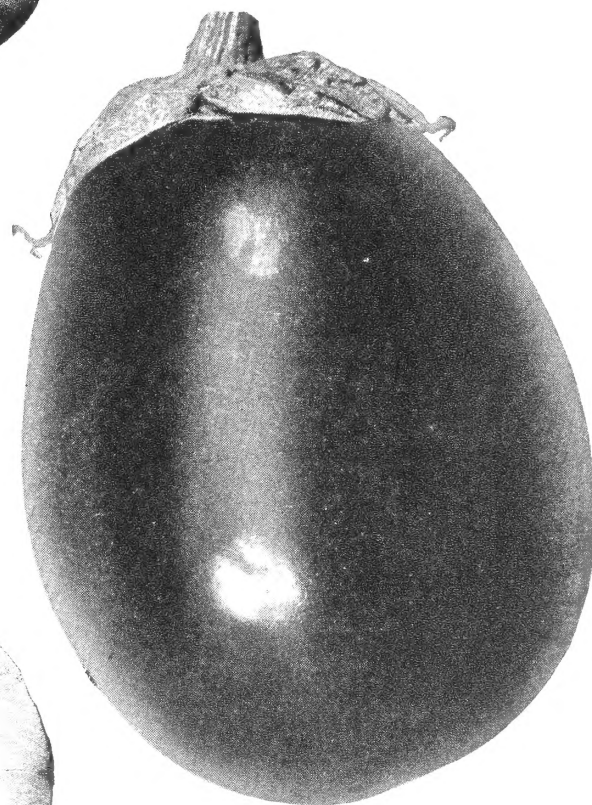

LARGE GREEN CURLED ENDIVE

EARLY WONDER BEETS

IMPERATOR CARROT

BLACK BEAUTY EGGPLANT

GOLDEN ACRE NO. 1 CABBAGE

CARROT, continued

	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.	50 lbs. or more per lb.	100 lbs. or more per lb.
INTERMEDIATE. An excellent main-crop variety with smooth orange roots measuring 10 to 11 inches. Uniform in shape, about 2½ inches diameter at shoulder, tapering to a point ¼lb.	\$1 00	\$3 00	\$2 90	\$2 80	\$2 70
MORSE'S BUNCHING. The roots are almost cylindrical with rounded shoulders. Recommended where a longer bunching Carrot is required.	1 00	3 00	2 90	2 80	2 70
NANTES. This variety is largely used on muck soils. Tops medium. Roots deep reddish orange, about 7 inches long, cylindrical, stump-rooted and coreless.	1 00	3 00	2 90	2 80	2 70
TENDERSWEET. A long slender Carrot, excellent for bunching. Color deep orange; very sweet and tender.	1 00	3 00	2 90	2 80	2 70
TOUCHON. Tops medium. Roots deep orange with inconspicuous core.	1 00	3 00	2 90	2 80	2 70

CAULIFLOWER 6 to 8 ounces per acre

	Oz.	¼lb.	1 lb. or more per lb.	10 lbs. or more per lb.
DWARF ERFURT. A desirable strain for late crop. It is of a dwarf, compact habit, with erect, dark green, pointed leaves growing closely about the flower. The snow-white heads of even surface are large, heavy, close-grained, and attractive when prepared for market	\$4 50	\$14 00	\$42 00	\$40 00
SUPER-SNOWBALL. An extra early variety producing uniform large heads	4 50	14 00	42 00	40 00
SNOWBALL NO. 1. One of the best of the Snowball Type for early planting. The heads are large and deep, snow-white, compact, solid and fine-grained. The plants are compact and well suited to close culture, while the large-sized leaves give exceptional protection to the heads. A number of our customers have cut 800 crates of number one Cauliflower per acre.	4 50	14 00	42 00	40 00
SNOWBALL NO. 2. An early variety of Snowball suitable for early culture, maturing about 10 days earlier than Erfurt. The heads are large, deep, solid and compact.	4 50	14 00	42 00	40 00
SNOWDRIFT. A Snowball type that is very hardy. The heads are white, very solid and compact, while the plant is very robust, with ample foliage to protect the heads from the sun. It matures slightly later than Snowball and is a desirable sort for late planting	4 50	14 00	42 00	40 00
DANISH GIANT or DRY WEATHER. A large, late variety, well adapted to withstand long dry seasons. The plants being of a robust habit give greater protection to the heads which are very solid, pure white.	4 50	14 00	42 00	40 00

CELERY 4 ounces per acre

EASY-BLANCHING. This is a pale green, early Celery. The plants are of medium height, vigorous, and not so susceptible to blight, while the stalks are broad, crisp, and tender. It has a very full heart which bleaches readily to a golden yellow color. Suitable for both muck and upland culture.	\$2 00	\$6 50	\$22 00	\$20 00
CORNELL NO. 19. A very good yellow variety for late planting.	2 00	7 00	25 00	23 00
GOLDEN SELF-BLANCHING. (Tall.) Similar to the well-known Golden Self-blanching, but is a more vigorous grower, earlier, taller and not so susceptible to blight.	2 00	6 50	22 00	20 00
PARAGON CELERY. A very desirable green Celery for late planting. It is a robust grower, semi-dwarf, is quite free from blight, and has a full heart which bleaches easily to a creamy yellow. The stalks are broad, solid, crisp, free from stringiness and of a fine nutty flavor. An excellent sort for storing for winter use	2 00	7 00	25 00	23 00
SUMMER PASCAL. A green variety of excellent quality. Plants are compact and grow about 16 inches tall. Stalks round, smooth, and have a glossy sheen	2 00	6 50	22 00	20 00
TRIUMPH. A Celery of exceptional merit. The plant is dwarf, vigorous, quite hardy, and has a very full heart. Stalks pale green, broad, quite thick, very solid, crisp and tender, bleaching readily to a golden yellow color. Highly recommended for an early or late crop	2 00	7 00	25 00	23 00
UTAH PASCAL 15. A green sort with thick round stems of fine quality.	2 00	6 50	22 00	20 00
UTAH 52-70. A tall, late, compact, dark green Celery of good quality.	3 00	10 00	30 00	
WONDERFUL NO. 1. This strain is taller and longer jointed than Wonderful Celery; we recommend it for early transplanting. The very full heart bleaches quickly to a lovely golden yellow color.	2 00	7 00	24 00	22 00
WONDERFUL NO. 2. A distinct and valuable early variety. The plants are semi-dwarf, very vigorous, and are not so susceptible to blight and other Celery diseases. It has a very full heart which bleaches quickly to a beautiful golden yellow color. In quality it is surpassed by none, and its handsome appearance commands a ready sale in any market. It is all the name implies—Wonderful.	2 00	7 00	24 00	22 00

CELERIAC

	Oz.	¼lb.	1 lb. or more per lb.	10 lbs. or more per lb.
LARGE SMOOTH PRAGUE. Turnip-rooted Celery	\$1 20	\$3 65	\$11 00	\$10 00

CHICORY *4 pounds per acre*

CATALOGNA. Dark green, narrow serrated leaves mostly used as greens.....	1 15	3 40	10 25	10 00
MAGDEBURG. Dried roots used as a substitute for coffee. Leaves used as greens.....	55	1 70	5 00	
WITLOOF or LARGE-ROOTED. Smooth roots 8 to 10 inches long. In fall roots are trans- planted and forced for French Endive; also used as greens.....	60	1 85	5 50	5 00

COLLARDS

	Oz.	¼lb.	1 lb.	10 lbs. or more per lb.	25 lbs. or more per lb.	50 lbs. or more per lb.
GEORGIA. Somewhat similar to Cabbage but does not form a head	\$0 15	\$0 45	\$1 70	\$1 60	\$1 55	\$1 50
CABBAGE or HEADING. Produces large folding leaves which are inclined to form heads	15	45	1 70	1 60	1 55	1 50
VATES. Leaves glossy and emerald green in color	15	45	1 70	1 60	1 55	1 50

CORN SALAD

A substitute for lettuce	60	1 70	5 00

STOWELL'S EVERGREEN. A late white-grained variety producing large ears having 14 or 16 rows of very deep sweet grain. Stalks about 7 feet. 100 days.....	\$0 45	\$0 41	\$0 39	\$0 38	\$0 37	\$0 35	\$0 30
WHIPCROSS HYBRID. A large-eared yellow Corn. Ears 12 or 14-rowed, of good flavor. Stalks 7 feet. 84 days.....	60	58	56	55	54	52	50

CRESS

	Oz.	¼ lb.	1 lb.		Oz.	¼ lb.	1 lb.
Curled. Leaves pungent. Used as salad.	\$0 40	\$1 15	\$3 50	Upland. Used as salad.	\$0 40	\$1 15	\$3 50

CUCUMBER *3 pounds per acre*

	¼ lb.	1 lb. or more per lb.	10 lbs. or more per lb.	50 lbs. or more per lb.	100 lbs. or more per lb.
DAVIS' PERFECT. This long smooth handsome white-spined Cucumber is extensively used. The vines are very productive, fruits very uniform and of deep green color. Suitable for forcing and outdoor culture	\$1 15	\$3 50	\$3 40	\$3 20	\$3 00
EARLY FORTUNE. An exceedingly early, prolific and attractive dark green white-spined variety	1 15	3 50	3 40	3 20	3 00
EARLY GREEN PROLIFIC. A very productive pickling sort.	1 15	3 50	3 40	3 20	3 00
LONGFELLOW. An attractive intense dark green sort, well adapted to greenhouse forcing, frame or outdoor culture. The long, slender, straight, smooth fruits always command top price in the market, measuring about 12 to 14 inches long, and remain in prime condition for a longer period than any other variety. Resistant to Cucumber and other diseases	1 15	3 50	3 40	3 20	3 00
LONG GREEN IMPROVED. Standard late sort, largely used for dill pickles.	1 15	3 50	3 40	3 20	3 00
MARKETER. A very handsome slender variety. Color rich dark green, vines very prolific.	1 15	3 50	3 40	3 20	3 00
NATIONAL PICKLING. The best pickling variety, producing fruits more uniform in shape and size than any other sort. The fruits are dark green, cylindrical in shape and blunt at both ends	1 00	3 10	3 00	2 80	2 60
COLORADO. A most desirable sort. The vines are vigorous and very prolific. Fruits very dark green and unusually uniform, measuring about 9 to 10 inches.....	1 05	3 15	3 05	2 95	2 75
SNOW'S PICKLING. One of the best varieties for pickling. The early-maturing, uniform-sized fruits are short, square-ended and of a rich deep green color. Very prolific.	1 00	3 10	3 00	2 80	2 60

DANDELION *4 to 5 pounds per acre*

THICK-LEAVED IMPROVED. A very early, large, thick-leaved variety, superior to the common sorts.	4 00	12 00
---	------	-------

DILL *5 pounds per acre*

	¼ lb.	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.	50 lbs. or more per lb.
MAMMOTH. An improved strain, taller and more productive than the common sort	\$0 60	\$1 80	\$1 70	\$1 60	\$1 50

EGGPLANT *4 ounces per acre*

	Oz.	¼ lb.	1 lb.
NEW YORK SPINELESS. Large, dark purple fruits of fine quality	\$1 30	\$4 00	\$12 00
BLACK BEAUTY. An improved strain of Black Beauty. The fruits are smooth, black-purple, and large. Plants are robust and very productive	1 30	4 00	12 00
FLORIDA HIGH BUSH. Plants vigorous and strong. Fruit more slender than Black Beauty not quite so dark.....	1 30	4 00	12 00
FORT MYERS MARKET. Plants are tall and vigorous. Quite resistant to blight. Fruits egg-shaped. Color dark purple.....	1 30	4 00	12 00

ENDIVE 3 to 4 pounds per acre

BATAVIAN FULL HEART (Escarolle). One of the best sorts for general use. The large heads are deep rosettes, and often measure 16 inches in diameter. The inner leaves bleach readily to a crisp creamy yellow color	Oz.	1/4 lb.	1 lb.
	\$0 35	\$1 00	\$3 00
LARGE GREEN CURLED. A large-framed vigorous variety. The bright green outer leaves are finely curled; the inner leaves form a compact center that bleaches creamy yellow	35	1 00	3 00

FENNEL 3 pounds per acre

FLORENCE. One of the best sorts. Has large, bulb-like, oval base	1/4 lb.	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.
	\$1 05	\$3 20	\$3 10	\$3 00
MESSINA. Not so tall as Florence. May be sown earlier. The base is more round but not so large	1 05	3 20	3 10	3 00

HERBS, Sweet, Pot, and Medicinal

	Oz.	1/4 lb.	1 lb.		Oz.	1/4 lb.
Basil, Sweet. Used for flavoring	\$0 45	\$1 35	\$4 00	Lavender. A perennial with penetrating fragrance	\$1 30	\$4 00
Borage	45	1 35	4 00	Savory, Summer. Used for flavoring	1 20	3 50
Dill, Mammoth	20	60	1 80	Sage	1 00	3 00
Fennel, Florence.	35	1 05	3 20	Thyme	3 00	10 00

KALE 4 ounces to transplant an acre

DWARF GREEN CURLED. This strain is superior to most Kales. The leaves are finer curled and darker; plants grow more uniform and compact; does not turn yellow so readily when cold weather sets in.	Oz.	1/4 lb.	1 lb.	10 lbs. or more per lb.
	\$0 45	\$1 35	\$4 10	\$4 00
TALL GREEN SCOTCH. Very hardy. Plants grow 2 1/2 feet high, with large, light green, curled leaves	60	1 70	5 10	5 00
SIBERIAN (SPROUTS). Very hardy and stand the winter well. The leaves are numerous, thick, coarse, and plume-like	35	1 05	3 10	3 00

KOHLRABI 2 pounds per acre

EARLY WHITE VIENNA. An early, small-leaved variety well suited for forcing and early outdoor planting	Oz.	1/4 lb.	1 lb.
	\$0 50	\$1 50	\$4 50
EXTRA EARLY PRAGUE. (Forcing)	50	1 50	4 50

LEEK 3 pounds per acre

AMERICAN FLAG. Very desirable for early use	80	2 35	7 00
GIANT ITALIAN. A large, hardy variety with thick stem and dark green, broad leaves	80	2 35	7 00
MUSSELBURGH. Large, thick variety with long white stems which have an attractive appearance ..	80	2 35	7 00
MONSTROSA CARENTAN. A hardy, long-keeping sort with deep grayish green leaves, thick stems, and mild flavor.	80	2 35	7 00

LETTUCE 3 pounds per acre

BIG BOSTON. Large, compact heads of light green color, slightly tinged with brown	Oz.	1/4 lb.	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.
	\$0 40	\$1 15	\$3 50	\$3 25	\$3 05
BLACK-SEEDED BIG BOSTON. A little earlier and larger than Big Boston. Heads solid and excellent quality	50	1 50	4 50	4 25	4 05
BLACK-SEEDED SIMPSON. Attractive, loose-leaved variety. Early. Large, compact plants. Light greenish yellow leaves. Fine quality.	40	1 15	3 50	3 25	3 05
BIBB. Loose-leaved. Small head; dark green thick leaves. Should be planted early as it bolts to seed quickly in hot weather.	60	1 85	5 45	5 20	5 00

LETTUCE, continued

	Oz.	¼lb.	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.
EARLY GREAT LAKES. A very desirable variety for early planting. Heads large with small ribs.	\$0 90	\$2 50	\$7 45	\$7 20	\$7 00
GRAND RAPIDS. Excellent for greenhouse culture and outdoor planting. Light green, curled leaves.	40	1 15	3 45	3 20	3 00
GREAT LAKES. One of the best heat-resistant varieties.	60	1 80	5 45	5 20	5 00
IMPERIAL F. A very desirable variety. Heads are large and compact and are not so susceptible to unfavorable weather conditions.	60	1 80	5 45	5 20	5 00
IMPERIAL 847. A black-seeded variety. The heads are large and solid and resist heat more than most sorts. Well suited for late planting.	60	1 80	5 45	5 20	5 00
IMPERIAL NO. 152. Heads medium large and compact. Resistant to tip-burn. Well adapted to varying conditions.	60	1 80	5 45	5 20	5 00
IMPERIAL NO. 44. Similar to No. 152. The heads are medium large, very firm and resistant to tip-burn.	60	1 80	5 45	5 20	5 00
NO. 456. A new heat-resistant sort.	60	1 80	5 45	5 20	5 00
NEW YORK NO. 55. A very early heading variety.	60	1 80	5 45	5 20	5 00
PARIS ISLAND COS. Slightly later and stands longer than Paris White Cos and is more resistant to tip-burn.	55	1 70	5 00	4 80	
SALAMANDER. One of the best varieties for withstanding heat. The heads are large and very attractive in appearance.	25	80	2 50	2 25	
WHITE BOSTON. A fancy stock of this variety. The heads are large, very solid, light green, and of fine quality. Well suited to spring or fall planting.	45	1 30	3 75	3 50	3 25
DARK GREEN COS. A medium-large dark green variety.	40	1 15	3 45	3 20	3 00
PARIS WHITE COS. Heads are large, medium green color, and self-blanching.	40	1 15	3 45	3 20	3 00
PENN LAKE. Smaller than Great Lakes.	90	2 50	7 45	7 20	7 00
PREMIER GREAT LAKES. More suited to hot weather than regular Great Lakes.	90	2 50	7 45	7 20	7 00
PROGRESS. Similar to No. 44 but larger and more heat resistant.	65	2 00	6 00	5 75	5 55

MUSKMELON *3 pounds per acre*

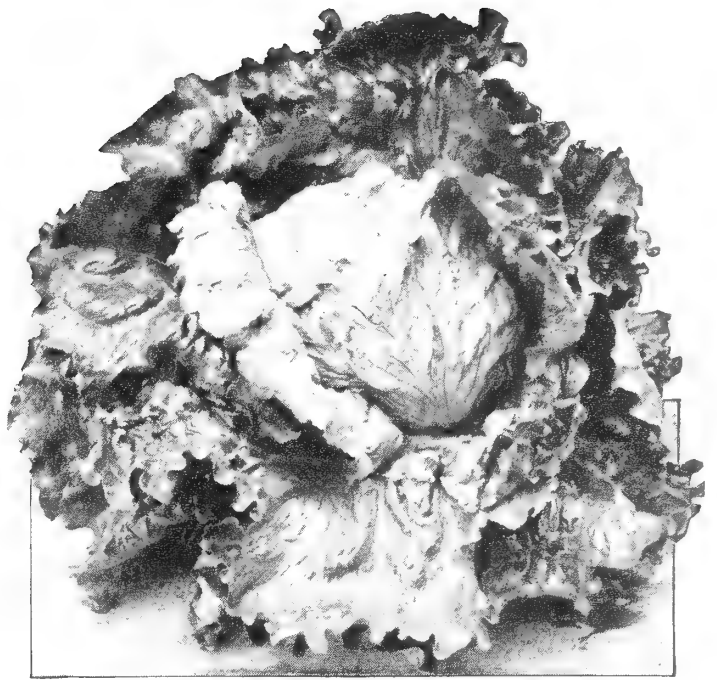

BENDER'S SURPRISE. An excellent main-crop variety. Fruits large, nearly round; fairly well-netted light greenish yellow skin; deep salmon flesh; small seed-cavity. Excellent quality.	1 15	3 50	3 40	3 20
GOLDEN DELICIOUS. Oval fruits, with coarse netting, bright salmon flesh. Very fine quality.	1 15	3 50	3 40	3 20
HALE'S BEST. Oval shape with heavy netting. Flesh salmon-orange color, exquisite flavor.	1 15	3 50	3 40	3 20
HEARTS OF GOLD. Vigorous and prolific vines. Fruits nearly round, finely netted, and uniform in size. Thick deep orange flesh of delicious flavor.	1 15	3 50	3 40	3 20
HONEY ROCK. Medium-sized fruits with grayish green skin, coarsely and heavily netted; deep, fine-grained salmon flesh of extremely rich flavor.	1 15	3 50	3 40	3 20
IROQUOIS. Similar to Bender's Surprise but not quite so large and better quality.	1 30	3 80	3 70	3 50
MILWAUKEE MARKET. Medium large, round fruits, well netted. Flesh bright salmon and very sweet.	1 15	3 50	3 40	3 20
PRIDE OF WISCONSIN. Medium size, well-netted. Flesh deep orange color and of excellent flavor.	1 15	3 50	3 40	3 20

WATERMELON *4 pounds per acre*

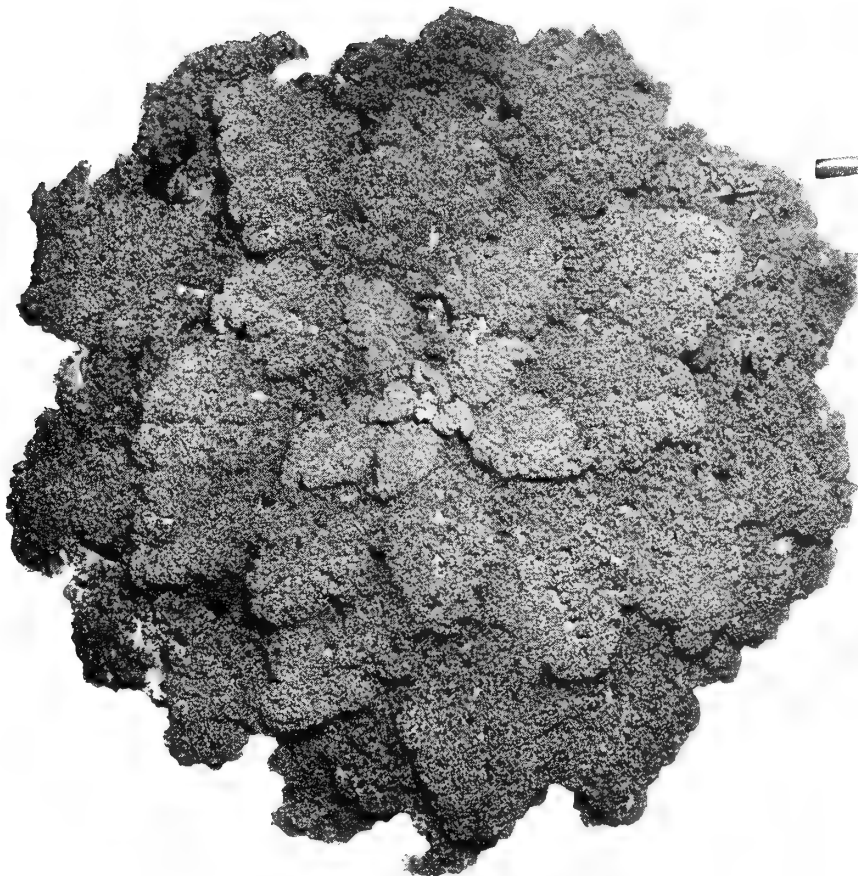

COLE'S EARLY. The best early variety for the eastern states. Medium-sized fruits with dark and light green stripes; flesh scarlet, of fine quality.	1 15	3 50	3 40	3 20
FLORIDA FAVORITE. Dark green rind striped with light green; crimson flesh of delicious flavor.	1 15	3 50	3 40	3 20
KLECKLEY SWEETS. Oblong, dark green fruits; excellent bright red flesh.	1 15	3 50	3 40	3 20
STONE MOUNTAIN. An early sort suitable for eastern states. Fruits are round, with dark green rind, slightly ribbed; deep crimson flesh of superb flavor.	1 15	3 50	3 40	3 20
TOM WATSON. A large, long, dark green melon. Flesh deep red and very sweet. A good shipper.	1 15	3 50	3 40	3 20
WINTER QUEEN. Medium-sized round melon with white skin; deep red flesh of fine quality.	1 15	3 50	3 40	3 20
NEW HAMPSHIRE MIDGET. A small and very early variety.	1 35	4 00	3 90	

SOUTHPORT WHITE GLOBE ONION

GREAT LAKES LETTUCE

DWARF GREEN CURLED KALE

GRADUS PEAS

MUSTARD 2 to 3 pounds per acre

		1 lb. or more per lb.	10 lbs. or more per lb.
FORDHOOK FANCY. Intensely curled, bright green leaves, with fringed edges. Excellent for garnish- ing and salads.	¼lb. \$0 50	\$1 50	\$1 40
GIANT SOUTHERN CURLED. Vigorous-growing plants with large light green leaves, having crumpled edges.	50	1 50	1 40

OKRA or GUMBO

DWARF GREEN LONG-POD. One of the best.	50	1 50	1 40

CHAMPION MOSS CURLED. Compact, dark green leaves, densely curled.	\$0 65	\$2 00	\$1 90	\$1 80
EXTRA-DOUBLE CURLED. Our best strain of Curled Parsley. Not so liable to tipburn. Color very dark. Exquisitely curled.	65	2 00	1 90	1 80
HAMBURG or ROOTED. The roots are parsnip-shaped, of medium length. Very fine stock.	65	2 00	1 90	1 80
PARAMOUNT. Compact, 12 inches tall, densely curled, rich dark green color.	65	2 00	1 90	1 80
PLAIN or ITALIAN. Very dark green serrated leaves.	65	2 00	1 90	1 80

PARSNIP 5 pounds per acre

	¼lb.	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.
GUERNSEY. Desirable hollow-crown variety. Roots are smooth and uniform.	\$0 60	\$1 85	\$1 75	\$1 65
HOLLOW CROWN. An early variety. Roots uniform in shape, 12 to 14 inches long, 2½ to 3 inches thick at shoulder, tapering to a point.	60	1 85	1 75	1 65
MODEL. Similar to Hollow Crown.	60	1 85	1 75	1 65

PEAS

90 pounds per acre

	1 lb. or more per lb.	10 lbs. or more per lb.	15 lbs. or more per lb.	30 lbs. or more per lb.	60 lbs. or more per lb.	120 lbs. or more per lb.	600 lbs. or more per lb.
ALASKA. An extremely early variety of good quality. Height, 2½ feet.	\$0 35	\$0 33	\$0 31	\$0 30	\$0 29	\$0 27	\$0 25
GRADUS or PROSPERITY. Early wrinkled Peas of fine quality. Height, 2½ feet.	35	33	31	30	29	27	25
HUNDREDFOLD. An early, dwarf, large-podded variety. Height, about 2 feet.	35	33	31	30	29	27	25
LAXTONIAN. One of the earliest of the large-podded dwarf Peas. Height, 2 feet.	35	33	31	30	29	27	25
LAXTON'S PROGRESS. An early, large-podded dwarf variety. The vines are robust, producing an abundance of dark green pods which are very attractive and contain 8 to 10 large Peas of excellent quality. Height, 1½ feet.	35	33	31	30	29	27	25
LITTLE MARVEL. An extra-early dwarf sort. Pods blunt, dark green, well filled with Peas of fine quality. Height, 1½ feet.	35	33	31	30	29	27	25
PRINCE EDWARD. A late main-crop variety. The vines are very productive; pods are large and well filled with delicious Peas. Height, about 4 feet.	35	33	31	30	29	27	25
THOMAS LAXTON. This superb early sort is noted for its exquisite flavor. The large, dark green pods with blunt ends are well filled with 7 or 8 large Peas of unsurpassed quality. Vines dark green, robust and very productive. Height, 3 feet.	35	33	31	30	29	27	25
WORLD'S RECORD. An excellent sort for early planting. The vines are vigorous and produce an immense crop of well-filled dark green pods usually containing 10 Peas of exceptional quality. Height, 2½ feet.	35	33	31	30	29	27	25

PEPPER

4 to 6 ounces to transplant an acre

	Oz.	¼ lb.	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.
CALIFORNIA WONDER. A large, heavy, smooth Pepper of dark green color. Surpasses all others for thickness of flesh and handsome appearance.	\$1 10	\$3 30	\$10 00	\$9 50	\$9 00
OAKVIEW WONDER. Similar to California Wonder but earlier and more prolific.	1 10	3 30	10 00	9 50	
YOLO WONDER. An improved strain of California Wonder. Fruits blocky and heavy; thick flesh. Quite productive.	1 25	3 80	10 50	10 00	
CAYENNE—LONG THICK. This strain is a great improvement on the ordinary variety, being longer and much thicker in the flesh and type of pod. Pungent.	1 10	3 30	10 00	9 50	
CAYENNE—LONG THIN. A long slender variety bright red in color when ripe. Very pungent.	1 10	3 30	10 00	9 50	
EARLY GIANT. Recommended for early crop. Large and sweet.	1 10	3 30	10 00	9 50	
HUNGARIAN—LONG YELLOW. An improved strain, producing bright yellow fruits 6 to 7 inches long; when ripe they turn deep crimson. Very prolific. Pungent.	1 10	3 30	10 00	9 50	
LARGE CHERRY RED. Cherry-shaped fruits considerably larger than the common Red Cherry. Extremely pungent and of a bright red color when ripe.	1 10	3 30	10 00	9 50	
NEAPOLITAN. Elongated fruits of upright growth, about 4 inches long, very early, mild, and sweet flavored.	1 10	3 30	10 00	9 50	
OSHKOSH. Medium early, deep green Pepper turning to canary-yellow when ripe. Thick walls and mild flavor.	1 10	3 30	10 00	9 50	
SQUASH or CHEESE. Flat tomato shape, slightly corrugated.	1 25	3 80	10 50	10 00	
SUNNYBROOK. Fruits are tomato shape, borne upright. Color deep green, turning red when ripe; flesh thick and mild.	1 10	3 30	10 00	9 50	

PEPPER, continued

	Oz.	¼lb.	1 lb. or more per lb.	10 lbs. or more per lb.
SURPRISE. A new Pepper of outstanding merit, somewhat similar to California Wonder. Very prolific. The deep green color changes to bright scarlet when ripe. Highly recommended.....	\$1 10	\$3 30	\$10 00	\$9 50
WORLD BEATER. Main crop variety. Fruits large; flesh thick and of mild flavor.....	1 10	3 30	10 00	9 50

PUMPKIN *3 to 4 pounds per acre*

CONNECTICUT FIELD. Largely cultivated for stock-feeding and canning.....	30	85	2 50	2 25
LARGE CHEESE. Large flat, creamy buff fruits of good quality.....	30	85	2 50	2 25
SMALL SUGAR. A small round variety of excellent quality. The flesh is rich yellow, and of a most delicious, sweet flavor	30	85	2 50	2 25

RADISH

10 to 15 pounds per acre

	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.	50 lbs. or more per lb.	100 lbs. or more per lb.	500 lbs. or more per lb.
CHERRY BELLE. Can be used for greenhouse or outdoors. Short Top.	\$1 50	\$1 40	\$1 35	\$1 30	\$1 25	\$1 15
COMET. Similar to Scarlet Globe.....	1 50	1 40	1 35	1 30	1 25	1 15
EARLY SCARLET GLOBE FORCING. Especially adapted for forcing. The earliest globe-shaped variety. Bright scarlet, uniform in size, with short tops just right for bunching.....	1 50	1 40	1 35	1 30	1 25	1 15
EARLY SCARLET GLOBE. Selected strain of this well-known sort. Of uniform shape and bright scarlet color—medium top.....	1 25	1 15	1 10	1 05	1 00	90
EARLY WHITE TURNIP. Quick-growing, waxy white, round Radish; very solid, crisp, and of good flavor.....	1 45	1 35	1 30	1 25	1 20	1 10
ICICLE. A handsome white Radish, about 5 inches long, crisp, and mild flavored.	1 30	1 20	1 15	1 10	1 05	1 00
ICICLE FORCING. A short-top strain recommended for culture under glass....	1 40	1 30	1 25	1 20	1 15	1 10
SCARLET TURNIP, WHITE-TIPPED. Very early. The roots are almost round, bright scarlet with well-marked white tip.....	1 30	1 20	1 15	1 10	1 05	1 00
SPARKLER. Resembles Scarlet Turnip. White-tipped, but the white base is more prominent.....	1 30	1 20	1 15	1 10	1 05	1 00
CHINA ROSE. Attractive bright rose-colored winter variety. Cylindrical, blunt roots about 6 inches long.....	1 55	1 45	1 40	1 35	1 30	1 20
ROUND BLACK SPANISH. Round black roots, 3 to 4 inches in diameter; flesh white, firm, and pungent, good keeper.....	1 55	1 45	1 40	1 35	1 30	1 20
WHITE CHINESE or CELESTIAL. Cylindrical, about 8 inches long; flesh white, of mild flavor.....	1 55	1 45	1 40	1 35	1 30	1 20
WHITE STRASBURG. A long, clear, white Radish, suitable for early or late planting.....	1 55	1 45	1 40	1 35	1 30	1 20

RAPE *5 pounds per acre*

	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.	50 lbs. or more per lb.	100 lbs. or more per lb.
DWARF ESSEX. This quick-growing forage plant is sometimes used as "greens" and cooked like cabbage.....	\$0 50	\$0 46	\$0 44	\$0 42	\$0 40

SALSIFY or OYSTER PLANT

	Oz.	¼lb.	1 lb.
MAMMOTH SANDWICH ISLAND. Produces long, tapering, creamy white roots.....	\$0 55	\$1 60	\$5 00

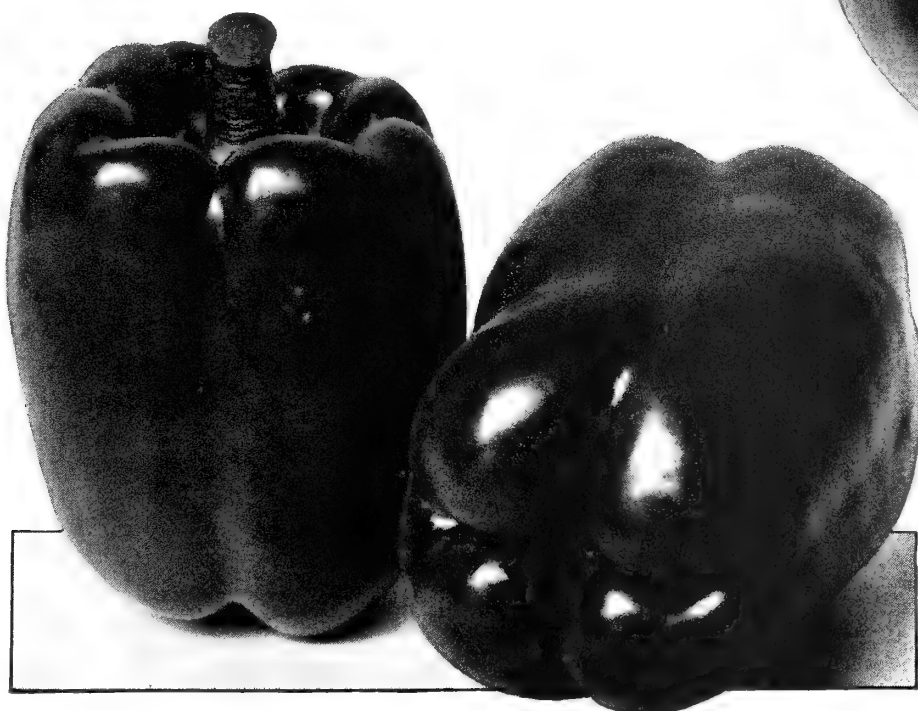

EARLY SCARLET GLOBE FORCING RADISHES

SAVOY SPINACH

EARLY PROLIFIC TOMATO

CALIFORNIA WONDER PEPPERS

SAVORY

	Oz.	¼lb.
SUMMER. Leaves and flowers used for flavoring.....	\$1 20	\$3 50

SORREL 3 to 4 pounds per acre

	1 lb. or more per lb.	10 lbs. or more per lb.
NARROW-LEAVED. Slow in going to seed. Long, narrow, bright green leaves.....	\$5 20	\$5 00

SPINACH

12 to 15 pounds per acre

	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.	50 lbs. or more per lb.	100 lbs. or more per lb.	500 lbs. or more per lb.
AMERICA. Dark green, crumpled leaves; compact plant. While slow to mature, it will stand a great deal of hot weather.	\$0 75	\$0 67	\$0 63	\$0 60	\$0 58	\$0 55
BLIGHT-RESISTANT SAVOY. Best suited for fall cutting; in eastern states should be sown not much earlier than August 20. The large green leaves are heavily crumpled.....	50	45	42	41	40	35
BLOOMSDALE SAVOY. A quick growing strain with dark green, heavy, crumpled leaves.....	50	45	42	41	40	35
BLOOMSDALE LONG-STANDING. Superior in every way to the older type Bloomsdale, being equally early, with heavier plants that remain longer before shooting to seed.....	50	45	42	41	40	35
KING OF DENMARK. A dark green variety with slightly crumpled leaves. Will withstand hot weather better than any other sort.....	50	45	42	41	40	35
LONG SEASON. The leaves are thick, dark green, and crumpled. Short-stemmed, compact plants. Good for summer crop.....	50	45	42	41	40	35
NEW ZEALAND. A distinct type varying in form from other Spinach. Thrives during hot weather and can be cut throughout the summer.....	1 55	1 50				
NOBEL GIANT THICK-LEAF. The best strain of round-leaved type. Suitable for spring or fall planting. Plants are large. Dark leaves and quite thick..	50	45	42	41	40	35
OLD DOMINION. A blight-resistant strain. In eastern states may be sown about 10 days earlier than Blight-resistant Savoy without danger of bolting to seed. Suitable to carry over winter. Dark green, curled leaves.....	50	45	42	41	40	35
PRINCESS JULIANA. Heavy, compact plants with very dark leaves, thick and crumpled. Good summer variety.....	50	45	42	41	40	35
SAVOY LONG-STANDING NO. 818. A reselected strain of Long-standing Savoy, withstanding summer heat longer than other Savoy strains. The leaves are intensely crumpled and an attractive dark green color.....	50	45	42	41	40	35
VIKING. A variety with large, thick, dark green leaves.....	50	45	42	41	40	35

SQUASH 4 pounds per acre

	Oz.	¼lb.	1 lb. or more per lb.	10 lbs. or more per lb.
BLUE HUBBARD. Similar to Hubbard but has a hard blue-gray shell	\$0 35	\$1 00	\$3 00	\$2 85
BUTTERCUP. Turban shaped. Flesh deep yellow, fine grained, very dry	50	1 50	4 50	4 35
BUTTERNUT. A long pear-shaped variety. Flesh thick, very sweet and dry.....	50	1 50	4 50	4 35
CASERTA. An early Cocozelle. Matures about the same time as Early Prolific.....	50	1 50	4 50	4 00
COCOZELLE STRIPED. Dark green with light green stripes	40	1 20	3 65	3 50
EARLY PROLIFIC. Similar to Giant Summer Straightneck but somewhat earlier	35	1 00	3 00	2 85
GIANT SUMMER STRAIGHTNECK. Improvement over Crookneck Squash, the fruits being nearly straight, 18 to 20 inches long, and of a lemon-yellow color	35	1 00	3 00	2 85
GOLDEN DELICIOUS. Fruit medium size. Flesh thick and very dry	35	1 00	3 00	2 85
GOLDEN HUBBARD. Deep orange; excellent quality. Good keeper	35	1 00	3 00	2 85
GREEN DELICIOUS. Good-keeping winter sort. Medium size. Yellow flesh with green skin	35	1 00	3 00	2 85
IMPROVED HUBBARD. A selected strain of this well-known variety. Dark green, hard shell; heavy fruits of fine quality	35	1 00	3 00	2 85
MAMMOTH WHITE BUSH SCALLOPED. Early summer Squash. Fruits round, flattened, with scalloped edges	35	1 00	3 00	2 85
TABLE QUEEN or DES MOINES. Dark green, acorn-shaped fruits. Very delicious	35	1 00	3 00	2 85
ROYAL ACORN. Similar to Table Queen but somewhat larger	35	1 00	3 00	2 85
WARTED HUBBARD. A very dark green, heavily warted sort. Good keeper	35	1 00	3 00	2 85

SWISS CHARD *5 pounds per acre*

LARGE WHITE FRENCH. A hardy white variety with large, globular roots and short neck					

Sold Out

Selected List of Flower Seeds

In the following pages we offer carefully selected seeds of the best and most popular Annuals, Biennials, Perennials, greenhouse and Climbing Plants

CULTURAL DIRECTIONS FOR FLOWER SEEDS

HALF-HARDY ANNUALS. (Bloom the same year the seeds are sown.) Should be sown during March in greenhouse, hotbed, or sunny window in the house. Shallow boxes or pans about 3 inches deep, with good drainage and filled with a compost of equal parts medium rich, light soil and sand which has been finely sifted, are best adapted to raising seedlings. Sow the seeds thinly on a moist, even surface, covering them slightly with fine soil, and press down firmly with a board. When the seedlings are large enough to handle, transplant into small pots, keeping them well aired to avoid spindly growth, and exercise great care in watering to prevent damping off. Transplant to open ground during May, when all danger from freezing is past.

HARDY ANNUALS. (Bloom the same year the seeds are sown.) As a rule, these thrive best when the seeds are sown where the plants are intended to blossom, rather than if transplanted. Sow the seed in the open ground when danger from frost is past and at intervals thereafter for succession of bloom. Thin out the young plants from 4 to 12 inches apart, according to height the plants attain when full grown. Pinch out when they are half grown or even in younger stage.

HARDY BIENNIALS. (Bloom the second year after seeds are sown.) The seed should be sown thinly in a shady location during the latter part of July and August, and when the seedlings are large enough, transplant to stand 6 inches apart. When there is danger from freezing and all through the winter months the plants should be protected by a good covering of leaves or wintered over in cold-frames. Transplant in the spring to the place where intended to bloom.

HARDY PERENNIALS. (Bloom the second year after the seeds are sown. Some varieties bloom the first year if sown early.) They are easily grown from seed and are most useful as cut-flowers. The seed may be sown under glass during February and March and treated in the same way as recommended for Half-hardy Annuals. The more satisfactory way, however, is to sow the seeds thinly in rows 4 to 6 inches apart in a prepared seed-bed outdoors, covering them to a depth of four times their size with fine soil firmly pressed down. When the seedlings are large enough, transplant to 6 inches apart in rich soil and give the young plants protection over winter. In spring set the plants in permanent location and keep the soil well cultivated.

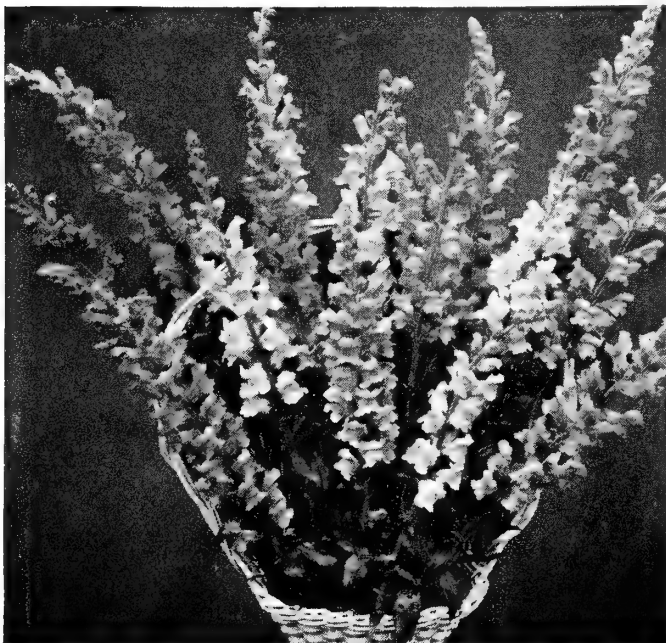

GREENHOUSE PLANTS. In this class we refer only to such plants as can be grown from seed under glass at any time, excepting the summer months, for greenhouse, conservatory, or home decoration, which require an even temperature of 55 to 70 degrees for successful cultivation. The seeds of some varieties are exceedingly small, therefore must be handled with care. Sow the seeds thinly in shallow boxes or pans in the greenhouse, hotbed, or sunny window, taking precaution against covering them too deeply, and keep the compost moist, not wet. When the seedlings have formed their second or third leaf, transplant, setting 2 inches apart in similar boxes, and when large enough transfer into 2½- or 3-inch pots, which in time will become filled with roots when it will be necessary to transfer the plants into larger-size pots.

Ageratum

Half-hardy Annual

Very free-blooming plants of bushy habit, useful for borders where it blooms all summer. Sow the seed early in spring, under glass, in shallow boxes, and transplant as soon as large enough; this secures early blooms. Seed may also be sown in the open ground when danger from frost is past.

Antirrhinum

Arctotis • African Lilac Daisy

Hardy Annual

One of the finest annuals for cutting, and easily grown from seed. The plants make a strong, robust growth and do best in a sunny location.

Grandis. The large, daisy-like flowers are borne on long stems, and being pure white, shaded delicate lavender, are very attractive. 36 in.. \$1 00 \$8 00

Antirrhinum • Snapdragon

Perennial Treated as Annual

The curiously formed blossoms of the Snapdragon and the splendid flower-spikes, with their great variety of colors, attract attention in any garden. They bloom continuously throughout the season and are well adapted for beds or borders, and also valuable as cut-flowers. Seed sown early in spring will produce flowers during the summer. If plants are taken up in the autumn and cut back and potted, they will bloom indoors during winter.

	Tr. pkt.	Oz.
Compacta, Triumph, Mixed.....	\$0 60	\$5 00

Pansy*Half-hardy Perennial*

This popular flower, so highly esteemed for its beauty and great variety of color, is too well known to require description. For best results, the special strains should be selected and the seed-bed thoroughly prepared and sufficiently moistened before sowing the seeds. Sow during July and August, in drills 3 inches apart; firm the seed in the soil and cover the seed-bed with boards, burlap, or paper, giving plenty of ventilation. This will retain the moisture and hasten the germination, and when the seeds have sprouted, remove the covering. Transplant the seedlings, when large enough to handle, into a rich, moist soil, spacing the plants 7 inches apart each way, and protect with leaves or litter during winter. Seed sown in spring will produce strong blooming plants in fall. For continuous bloom, the flowers must be gathered when fully developed. 8 inches.

Petunia

Half-hardy Annual

The supreme annual flowering plant. The great diversity of exquisite colorings, also the early and continuous blooming quality of the showy, fragrant flowers, create a wonderful and pleasing display in beds, borders, window-boxes, vases, and balconies. For outside decoration, few flowers can surpass the Petunia. It is of easy culture and thrives best in a good soil and sunny location. Considerable improvement in habit of plant and increased range of color of the flower has been accomplished in recent years.

Giants of California Petunias

Phlox Drummondii*Hardy Annual*

This easily grown annual, with its dazzling display of color, is probably the most desirable of all hardy garden flowers. Sow in a sunny location when danger of frost is past, and you will have a remarkable display of bloom in a very short time. May also be started under glass and transplanted when weather is suitable to get an extra-early display in beds or borders.

Portulaca*Hardy Annual*

This dwarf-growing annual is most suitable for beds, edgings, or rock-work. Will cover the space sown with a rich, green carpet of foliage, surmounted by a mass of flowers making a gorgeous display. The mixtures we offer contain many shades of red, pure white and yellow. Sow when there is warmth in the soil.

	Tr. pkt.	Oz.
Single, Mixed. 6 inches.....	\$0 25	\$2 00
Double, Mixed. 6 inches.....	50	3 50

Pyrethrum*Hardy Perennial*

An old-time favorite for the herbaceous border. The large, daisy-like flowers in rose, crimson, and white shades are borne on long, straight stems with fern-like foliage and are highly adapted for cutting. The plants grow robust and bloom profusely throughout the season.

	Tr. pkt.	Oz.
Roseum hybridum, Single Mixed. 30 inches..	\$0 50	\$4 50

Physalis • Chinese Lantern Plant*Half-hardy Perennial*

A showy, ornamental plant producing lantern-shaped pods which develop to a brilliant deep orange color in the autumn. Extensively used as an everlasting flower for decorative purposes. It will bloom the first season if seed is sown under glass during February or March. 24 inches.

	Tr. pkt.	Oz.
Francheti.	\$0 15	\$1 00

Oriental Poppies

Ricinus • Castor-Oil Plant*Hardy Annual*

A handsome ornamental foliage plant. When grown in beds with cannas and salvias, the large leaves, ranging in different shades of green and dark red, make a splendid contrast and bestow a tropical effect wherever used for garden decoration. The seeds may be planted whenever danger from frost is past, in the place where they are to remain, and the young plants thinned out to allow plenty of room for their development.

	Oz.	¼lb.
Mixed.	\$0 70	\$2 00

Salpiglossis • Velvet Flower*Half-hardy Annual*

One of the most beautiful free-flowering annuals, worthy of more extensive culture and popularity. The attractive, funnel-shaped flowers, vividly veined in crimson, scarlet, yellow, violet, and purple shades, are carried on long, slender, branching stems. The plants thrive best in a light rich soil and bloom profusely from July until fall. Excellent for cut-flowers.

	Tr. pkt.	Oz.

Verbena

Half-hardy Annual

This highly esteemed garden annual of low-growing or trailing habit has been considerably improved in recent years. The flower-cluster, as well as the individual bloom, is greatly increased in size and the range of colors extended. Particularly adapted for beds, borders, or window-boxes on account of their continuous-blooming quality and harmonious blending of colors. Seed sown under glass during February will bloom in June, and if sown in the open ground during May will bloom in August. We offer specially selected strains of these beautiful flowers.
